Coldline made major investments in design research, becoming a leader in technology and innovation. Each cabinet marked with the FSS symbol is equipped with a refrigeration system independent of the structure, which provides improved flexibility and service.

FSS • FAST SERVICE SYSTEM

- You can change the intended use of an appliance, a freezer into a chiller - and the other way around - even after years of installation.
- You can extend the life of a refrigeration cabinet by replacing its old refrigeration system with a new one.
- Maintenance and service are simple, quick and do not require specialised personnel.

NO-COMPROMISE QUALITY STEEL

AISI 304

AISI 304 18/10 is a high quality steel. Its stability guarantees good-looking and durable products, ensuring maximum hygiene and corrosion resistance over time.

75 mm

INSULATION THICKNESS

The 75 mm thick insulation ensures lower heat loss, reduced work of the compressor, therefore lower energy consumption.

INTELLIGENT DEFROST

Intelligent defrost changes according to the actual presence of frost. The system runs for the minimum time required.

EVAPORATION SYSTEM

The automatic evaporation of condensing water is activated only in the presence of water produced as a result of a defrost cycle.

CONSTANT TEMPERATURE

The fans stop when the door is opened to reduce temperature changes and consequently reduce the work of the compressor.

ASPERA COMPRESSORS

Aspera compressors reduce energy consumption by 15% and acoustic impact by 5 dBA.
